

Recently Completed Tasks

1. Vercel Deployment & Infrastructure

- **Setup Vercel Deployment:** Configured the initial Vercel hosting setup for the application.
- **Created Vercel Deployment Guide:** Added `vercel_manual_deploy_workflow.md` documentation to outline the 2-step manual deployment process via a personal mirror repository (bypassing Chingu organization Pro-tier requirements).
- **Fixed Swagger UI on Vercel:**
 - Served Swagger UI via a custom CDN-only HTML to resolve Vercel MIME errors.
 - Whitelisted `cdnjs` in Helmet Content Security Policy (CSP) to unblock the Swagger UI.
 - Replaced dynamic glob paths with explicit inline Swagger paths to ensure compatibility across Windows and Vercel environments.

2. Architecture & Real-Time Migration

- **Migrated to Supabase Realtime:** Completely replaced `socket.io` with Supabase Realtime for handling real-time backend events.

3. API Documentation

- **Added Swagger Docs:** Integrated and deployed Swagger for clear, interactive API documentation.

4. Team Documentation & CI Updates

- **Updated Team Roster:** Added Ruthigwe Oruta to the team section in the `README.md`.
- **Created Onboarding Guide:** Wrote and merged a new Developer Onboarding Guide for the team.

- **Fixed CI Workflow:** Updated the Continuous Integration (CI) workflow to correctly trigger on the `development` branch.
